Town of Dayton, Virginia
Attention: Ms. Angela Lawrence, Town Manager
125 B Eastview Street
Dayton, Virginia 22821

Re: Water Membranes Systems, LLC/Pall Water Scope of Supply
Membrane Filtration System

Dear Ms. Lawrence

Water Membranes Systems, LLC/Pall Water Technologies are pleased to offer the following proposal for the supply of the Membrane Filtration System as described in the Pall Water Proposal enclosed herein.

The proposed system is designed to supply the Town with a water treatment capacity of 3.10 Million Gallons per day and will be configured so the system can be easily upgraded to treat a maximum of 4.0 Million Gallons per day.

All components and systems proposed for supply by Pall Water are discussed and shown in the Pall Water Proposal attached.

Water Membranes proposes to supply additional equipment and services. These are:

One (1) Water Softening System designed to provide softened water to the Clean-In-Place System supplied by Pall water under this Contract.

One (1) Project Management Services including coordination between the Town, The Contractor and Pall Water. Services include project milestone scheduling, equipment invoicing and payment collection as well as after Start-Up acceptance Services.
